

## Packaging laminates for BOV systems

In order to meet the challenging demands of Bag on Valve systems for the aerosol industry, Wipf have designed a range of laminate structures to provide the widest window of performance balanced with cost.

Wipf BOV Laminates are engineered to meet the technical requirements of each specific customer on machinability and resistance to aggressive filling formulations. Thanks to the excellent barrier and sealing properties of our materials, combined with our sophisticated manufacturing processes, customer product

formulations are provided with the maximum safeguard.

Our BOV laminate materials are available in roll stock to run on BOV packaging lines, or we can also supply in ready made pre-formed bag/pouch format.

We would be happy to advise you personally and develop the best possible solution for your application.

Please contact us for any assistance!

## Product overview

### Applications

- Personal Care
- Cosmetics
- Pharmaceuticals
- Food
- Industrial Applications

### Your benefits

- Suitable for high and low viscosity products.
- Compatible with PE and PP valve bodies.
- Highest bond and seal strength is provided.
- Best possible resistance to aggressive formulations.
- Wipf laminates are EU and FDA compliant.

### Full Technical Support

- Highly qualified technical field service available for all our customers.
- Fully equipped state of the art laboratory facility.
- Extensive product testing (eg. stability and barrier testing).
- Continuous product development and improvement of films and structures.
